The dream

Direction: Franc Aleu

Script: Franc Aleu, Jo Sol

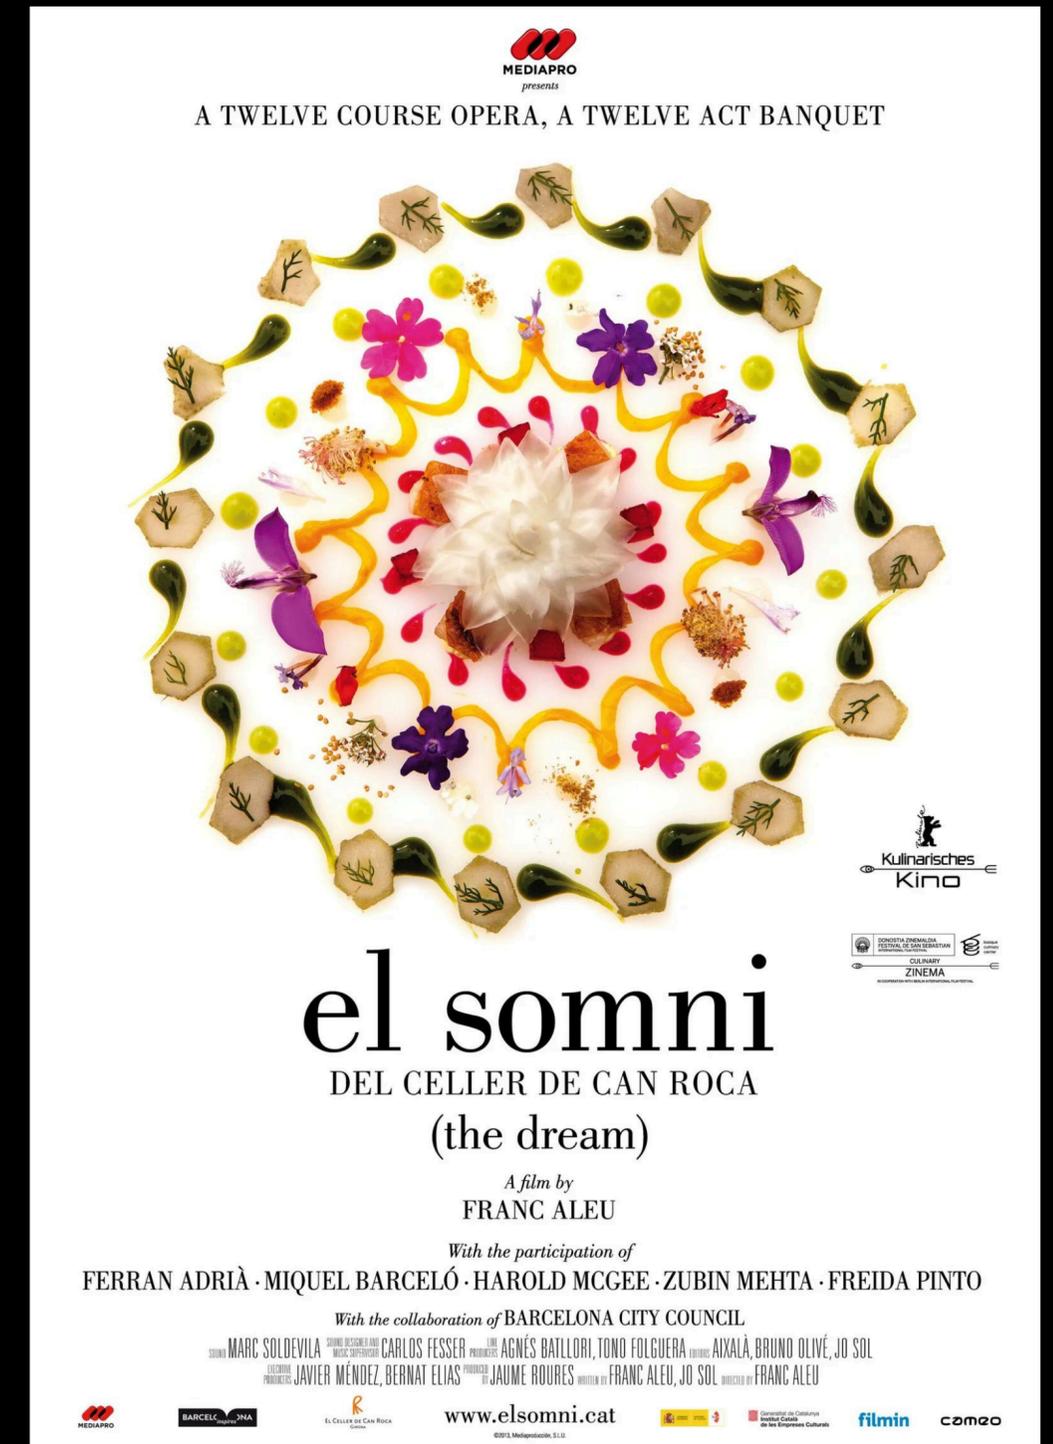

Cast: Joan Roca, Josep Roca, Jordi Roca

Producers: GPD

The Dream is a journey through the world of ideas, creation and thought using the discourse inherent to documentary films, combining narrative and stylistic resources ranging over the broadest spectrum of sources of experimental art, fiction and animation film sources. Being impossible to condense into the genre of film, this free creative feature-length film extends and complements everything the el somni (The Dream) project conveys.

The story unfolds following the same 12 concepts outlined in the libretto of the culinary opera, contributing additional features and fresh dimension to the overall project narrative. It should under no circumstance be confused with a “making of” of the project’s creative process; on the contrary, it is best expressed as a work in its own right.
