Producers: The Mediapro Studio en asociación con Hulu Japan

Determined to continue her father's research, Rachel (Olivia Morris) believes she has pinpointed the toxin that contaminated the algae. Following genetic modification and testing on animals, it's now time for human trials. She has thus selected five volunteers of different backgrounds who are willing to act as guinea pigs in exchange for a sizable sum of money. Everything seems to be going well until a new death and the disappearance of a head once again convert the remote location into a nightmare.
