Sara Grau is a forensic pathologist happily married to a high-level corporate executive. Night and Day starts off the day that, while performing an autopsy on an unidentified body, she thinks she recognizes him as someone with whom she had shared a brief affair in the past. This discovery turns her life upside down, revealing a hidden truth lying beneath a veneer of apparent stability. From that point on, Sara finds herself trying to juggle between determining the cause of death in a string of murders, and maintaining a stable and normal life that includes the decision of whether or not to have a child with her husband. Life and death in constant play.
